

ProjectDemoPlanning

Date	14 July 2026
TeamID	SWUID2026221635
ProjectName	A Comprehensive Measure of Well-Being (HDI Prediction & Analysis)
MaximumMarks	1Mark

ProjectDemoPlanning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Context	Welcoming panel, outlining project importance, scope, and objective.	2 mins	Pbvsn Mahitha
2	Architecture & Stack	Highlighting Python, Flask, Pandas, and Scikit-learn choices.	2 mins	Sneha Potluri
3	ML Model Pipeline	Explaining data handling, Linear Regression execution, and Pickle loading.	3 mins	Venkatesh Bonthu
4	Live App Walkthrough	Showing register, login, parameter adjustments, and live results.	4 mins	Moka Jaswanth
5	Visualization & Reports	Explaining dashboard charts and PDF summary exports.	2 mins	Gopika Snigdha
6	Summary & Open Q&A	Wrapping up observations and taking panel questions.	2 mins	All Team Members

DemoFlowSummary:

Step	Activity	Notes
1	Introduction & Problem Statement	Clearly highlight why predicting HDI scores based on localized changes is helpful for global policymakers.
2	Solution Overview	Explain how Flask acts as the structural bridge connecting your Python processing core with the UI views.
3	Live Feature Demonstration	Run a live test scenario: Slide values to maximize GNI and schooling, then show the live continuous score change on screen.
4	Q&A Session	Be ready to answer questions about using Linear Regression for continuous indexing instead of a simple classification model.
