

Brainstorming&IdeaPrioritizationTemplate

Date	15 July 2026
TeamID	SWUID2026221635
ProjectName	A Comprehensive Measure of Well-Being (HDI Prediction & Analysis)
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	TeamMember	Idea / Suggestion	Category	Group No.
1	Pbvsn Mahitha	Build a web dashboard where users can adjust parameter sliders (Life Expectancy, Schooling, GNI) to instantly predict continuous HDI scores.	Core Application	Group 1
2	Gopika snigdha	Generate dynamic data visualization charts (like Scatterplots and Correlation Heatmaps) on the dashboard using Matplotlib and Seaborn.	Data Visualization	Group 1
3	Moka Jaswanth	Add user authentication with custom role-based access: Admin (can upload datasets and retrain the model) and Standard User (can only view predictions).	Security & Access	Group 1
4	Venkatesh Bonthu	Set strict input boundary checks on sliders (e.g., Lifespan 0-120 years) on both frontend and backend to avoid mathematical prediction errors.	Business Logic	Group 2
5	Sneha Potluri	Implement an external integration to fetch live global indices occasionally using the	External Integration	Group 3

Brainstorming & Idea Prioritization Template

		official World Bank API.		
6	Sneha Potluri	Create a client-side feature to export and download the predicted HDI report and charts as a structured PDF document.	Reporting	Group 3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Interactive ML-based HDI Prediction Core with user sliders, backend Linear Regression integration, and data validation bounds.	High	High	High	Yes
2	Secure Portal with Role-Based Authorization (Admin role for model retraining and Standard User role for predicting).	High	Medium	Medium	Yes
3	Live World Bank API Integration & PDF Report Generation for exporting results.	Medium	Low	Low	No (Deferred for future scope)
