

Customer Journey Map

Date	14 July 2026
TeamID	SWUID2026221635
ProjectName	A Comprehensive Measure of Well-Being (HDI Prediction & Analysis)
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	The user visits the landing page, reads about HDI indicators, and clicks 'Start Assessment'	The user inputs specific metrics (Life Expectancy, Education years, GNI per capita) into the web form.	The user submits the data, views the predicted HDI tier, and analyzes the visualization charts
Touchpoint <i>What part of the service do they interact with?</i>	Web UI Landing Page, Navigation Menu, and Project Overview section	Assessment Form, Input fields, validation tooltips, and slider controls	Results Dashboard, Prediction card, Seaborn/Matplotlib visualization graphs, and Recommendation panel
Customer Thought <i>What is the customer thinking?</i>	"Is this tool easy to use? What metrics do I need to prepare to get an accurate prediction?"	"Let me input my country's development parameters to see what level of human development we fall into."	"Wow, this predicted our HDI score instantly! The visual charts make the development gaps so easy to see."

Customer Feeling <i>What is the customer feeling?</i>	Curious and hopeful about exploring global human development metrics	Focused, slightly anxious about entering correct parameters, but engaged	Satisfied, enlightened, and confident in the insights provided by the model
Process Ownership <i>Who is in the lead on this?</i>	Frontend Developer (Pbvsn Mahitha & Gopika Snigdha)	Backend & UI Developer (Sneha Potluri & Moka Jaswanth)	Machine Learning Engineer & Data Analyst (Venkatesh Bonthu)
Opportunities <i>How can we improve this stage?</i>	Add clear definitions or tooltips explaining what GNI or expected years of schooling mean	Add auto-fill templates for specific countries so users don't have to guess the metrics	Allow users to download the final analysis report and comparative charts as a PDF
